-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3621

DETAILED ACTION

1. This office action is in response to Application No. 09/853,504 filed on 05/11/2001.

2. Claims 1-41 are pending.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-41 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Bradshaw et al US 2001/0044834 A1 in view of Leung et al (U.S. Pat. No. 7,010,808). As per claims 1, 6-27 and 33-41- Bradshaw substantially discloses a method/apparatus for automatically depaloying data within a website development software application. An automatic synchronization features provide the ability to retrieve and store data in a manner that is transparent to a user, such as a website developer (**or webmaster or delegator**).

The method comprising of:

A delegator identifying content to be worked upon and delegating the work to a delegate (delegate or contributors performing website related tasks), sending to the delegate a manisfest describing the delegated work, the manifest defining the extent of work to be

Art Unit: 3621

done, receiving content from the delegate together with a returned manifest, each manifest (see., abstract, fig 1, pages 1-9, specifically [0051] and [0074].

Bradshaw fails to explicitly disclose the step of identifying and verifying the digital content. However, Leung discloses a digital content 12 as an identifier that is rendered on a device by transferring the content to the device (see., Leung, abstract, col 7, lines 1-44). Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to modify the web developer of Bradshaw by including the limitation detailed above as taught by Leung because this would allow webmaster or delegator to identify authorized users or contributors.

As per claims 2-5, 28-32 Leung discloses the claimed method in which, prior to assigning content to a delegate, a public cryptographic key is obtained from the delegate (see., Leung, abstract, col 9, lines 31-53).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 571 272 6706. The examiner can normally be reached on 6:30 to 5:00.
